Dave,

If we schedule the call before noon, the only days ARCs team has conflicts is Sept 10 and 18.  
We can make any other morning.

Jack,

Will need to get back to you next week as Steve is not in the office this week.

In general, are there days the weeks of Sept 8 and Sept 14 that work better than others?  
Because Robert is on the east coast the call will need to be scheduled for the AM Pacific Time.

Thanks,

David A. Seter, P.E.

**Subject:** Yerington Geochemical discussion

Dave,

I left you a voicemail on this but wanted to follow up with an email. ARC would like to schedule a quick phone call with EPA to discuss our understanding of EPA's expectation for the Geochemical submittal that will be coming in the near future. Based on past discussions at groundwater technical meetings I believe we are pulling together a document that meets the needs of the RI, but I believe it's prudent to confirm that prior to submittal. In particular, we would like the opportunity to discuss with yourself, Steve Acree, and Robert Ford, if possible.

To be clear, we are not requesting to discuss any findings or results that will be presented in the document, but rather want to discuss and confirm the scope of evaluation that the document will contain.

Jeryl,

I've copied you on this in case you would like to be involved in this discussion as well.

Feel free to give me a call if you have any questions or need additional information.

Thanks,

-jack
